

Task: Task Sharing & Visibility in Task Management System

Objective:

After completing Login, Register, and Task Creation, implement a feature to share and display tasks to other users based on roles.

Requirements:

1) Task Assignment: Assign tasks to employees and store assigned user ID. 2) Role-Based Visibility: - Employee: View assigned tasks - TL: View team tasks - Manager/Admin: View all tasks 3) Task List: Show task name, description, assigned to/by, status, date 4) Update Status: Employee can update task status 5) Task Details Popup: Show full task info 6) Backend: Add fields (assignedTo, assignedBy, status) and APIs 7) UI: Clean, responsive, with validation

Expected Outcome:

Tasks should be visible based on roles with proper assignment and tracking.
